DECLARATION OF ALAN HAAKSMA UNDER 37 CFR § 1.131

I, Alan Haaksma, declare the following:

1. I am Alan Haaksma, a co-inventor of the subject matter described and claimed in the patent application identified above (the "Application").
2. I have personal knowledge of the facts set forth in this Declaration regarding the conception and diligent reduction to practice of the invention described and claimed in the Application.
3. My co-inventor, Dustin Ide, and I conceived the invention disclosed and claimed in the Application (the "Invention in the Claims") before March 21, 2000 (the "Reference Date"), and engaged in diligent efforts to reduce it to practice from a date before the Reference Date continuously until it was actually or constructively reduced to practice.
4. Dustin Ide and I conceived of the Invention in the Claims long before the Reference Date.
5. Ide and I decided to establish a business entity to commercialize the Invention in the Claims. We reserved an Internet domain (lifelinecd.com) on October 21, 1999, shown in the "Record created on" field of the WHOIS report in Appendix A to this Declaration, for use by that business entity.
6. We established a corporation called The Statum Group Incorporated ("Statum"), the previous assignee of this application, and in connection with Statum we created a draft "Business Plan," a portion of which is attached as Appendix B to this Declaration.

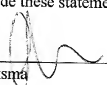

7. Our conception of the Invention in the Claims and some of our subsequent diligence to reduce it to practice are chronicled in Appendix B, beginning at least with the entry in the fifth bullet: "Q3/99 The CD Solution is adopted and The LifeLineCD comes to life, a simple migration from our Internet solution. We now have the ability to implement the optimum solution, given changing customer preferences and technical developments." Appendix B is taken from a draft Business Plan, the remainder of which includes confidential business information proprietary to Statum, but is available for non-public disclosure to the Office if necessary.

8. The Business Plan included the section describing the technology we developed, and that section was attached as Annex A to my earlier evidentiary Declaration in this application.

9. The Invention in the Claims provided the technological basis for creation of Statum as a new business enterprise in Ontario, Canada, on March 13, 2000. Dustin Ide and I, then we at Statum worked diligently to produce a working system embodying the Invention in the Claims from at least as early as the Reference Date until such an embodiment was completed and demonstrated to The Trillium Health Center in Mississauga, Ontario, in the 4th calendar quarter of 1999.

10. I personally conveyed a copy of a version of the Business Plan to my patent attorney in Canada at least as early as May 2000. Dustin Ide and I, then we at Statum worked diligently to produce a marketable product and patent-ready description of the Invention in the Claims from at least as early as the Reference Date until that patent attorney filed patent applications on behalf of Statum on July 16, 2001, and January 15, 2003.

I provide these statements under penalty of perjury pursuant to 18 U.S.C. §1001.

Alan Haaksma
